## 2"x4" Rear Subframe Kit

Ladder Bar and 4-Link As Shown **\$815**

## Center Frame Kit

Complete Frame Kit with exhaust tubes **\$350**

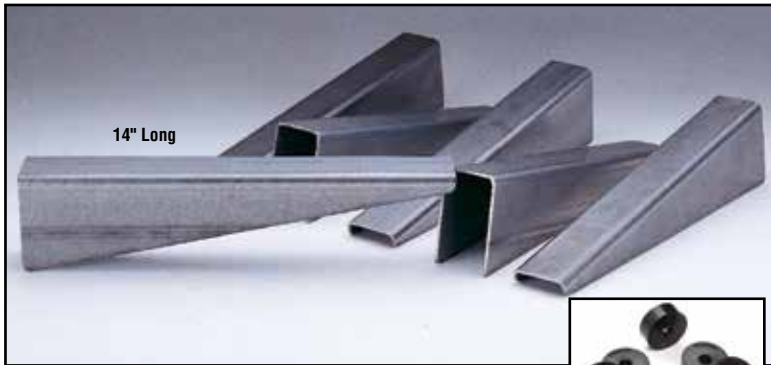

## Custom 2x3 And 2x4 Bare Frames And Subframe Kits

Complete bumper-to-bumper frames and subframes are available in welded or unwelded form. They are custom-made to your exact requirements. Consult your AME tech rep for details.

A perfect compliment to the 2x3 (.120" wall) frames for drag racing and Pro Street use are NHRA accepted roll cages shown on pages 50-51. AME also offers a wide range of crossmembers, mounts and ancillary chassis components to aid builders.

Also available are unwelded center frame kits that strengthen the chassis and are offered with provisions for routing the exhaust. They are mandrel-formed out of 2x4 rectangular tubing (.120" wall).

32347100	Center Frame Kit.....	\$350.00
32347101	Center Frame Kit without exhaust tubes .....	315.00
32347102	Center Frame Kit with 3" exhaust .....	410.00

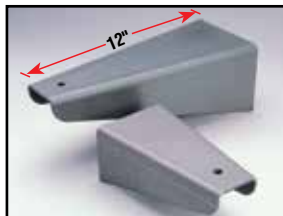

14" Long

## Body Mounts & Kits

Available as a kit with six 14" angle-cut mounts or as individual units in four configurations (rectangular, straight cut or with radiused ends), plus companion outrigger bushings.

65678000	Outrigger body mount kit (six 14" mounts) .....	\$95.00
65678001	Outrigger body bushing (each) .....	2.50
65679001	14" angle cut body mount (each) .....	16.00
65678020	12" radiused body mount (each) .....	20.00
65678021	7.5" radiused body mount (each) .....	15.00
33334000	Rectangular tube body mount (each) .....	10.00

12"

Weld-In

(Typical)

## Frame Connectors

One of the most important chassis modifications you can do to a unibody car is to connect the front and rear subframes. These connectors can be used to reinforce the stock chassis members, or in conjunction with a front or rear clip (or both).

31317000	'67-69 Camaro .....	\$80.00
31317100	'70-81 Camaro .....	80.00
