

Triangulated 4-Bar Suspensions

Tri 4-Bar Rear Clip

This versatile setup provides excellent rear end control for both acceleration and handling, and is employed on a large percentage of AME's GT Sport and MaxG chassis. The CAD-engineered rear subframe is custom-made for the exact year/make/model vehicle and features passageways in the crossmember for the exhaust and for the driveshaft to facilitate a low center of gravity and provide improved handling. The suspension setup controls both housing "twist" and lateral movement. The "big tube" 1-3/8" diameter bars feature Morrison poly-bushed stainless steel rod ends. The rear sway-bar, coil-over shocks, and 9" housing complete the package.

Tri 4-Bar Kit

There's no doubt that this is the most versatile setup for both street rods and GT-type cars as it provides excellent rear end control in both acceleration and handling situations due to stabilizing both housing rotation and side loading. It's been proven highly effective in tests conducted by leading automotive enthusiast publications. The kit contains four bars with AME polyurethane-bushed stainless steel rod ends, plus all required mounting brackets and hardware. Kit also available with a sway-bar to provide extra control over body roll.
