Barn find 57 with original paint. Built by David Strom Jr. Uses 4-link rear clip

Art Morrison's 4-link rear suspensions are perfect for competition or street applications where maximum adjustability is desired. There are six upper bar front mounts plus four lower bar attachment holes, along with two top and bottom housing mounts and adjustable bars to provide you with any "instant center" point desired.

The link tubes are 1-3/8" chrome-moly with threaded tube adapters for maximum strength. Mounting plates are made of 3/16" steel and of a double sheer, 360° design.

We also offer a "Big Tube" unwelded kit, which also features large diameter .095" wall tubing.

You have a choice between three rod end packages. For street applications our special polyurethane-bushed 17-4 stainless steel rod ends are utilized. They are exceptionally rugged, and provide the necessary quietness for street operation. For racing, our popular "4/4" kit consists of four 4130 chrome moly and four commercial grade rod ends, while for maximum reliability we offer all 4130 rod ends.

Most of our 4-links are sold in complete rear suspension packages. They include the 4-link with frame and housing brackets, coil-over rear shocks with springs rate-matched to your application and a choice of a Panhard Bar (for street use) or diagonal link (race).
