

AME GT Sport Rear Subframes

Three Highly Effective Rear Clips for 1967-69 Camaros

3-LINK

**As shown
\$5,980**

**Now Standard With
Adjustable Swaybars**

TRI 4-BAR

**Triangular
4-bar with
2x4 subframe
(as shown)
\$4,495**

MULTI-LINK I.R.S.

Cut-away view of Morrison's 2"x4" frame vs. OEM stamped rail

From \$14,225 GM differential and performance axles
From \$14,460 Strange S60 Differential and high HP axles

Art Morrison Enterprises offer three highly effective and easy to install AME GT Sport rear subframes for 1st Generation Camaros. All employ rugged 2"x4" mandrel-formed frame rails that are far stronger than flimsy OEM stampings, which makes them better suited to coping with the increased stresses that come with aggressive driving. The subframes are also designed to be used with the stock gas tank.

Of course, the difference is what lies between the frame rails. And here's where the choices come into play. Our popular Tri 4-bar setup offers the advantage of fitting under the stock Camaro floorpan. No modifications are necessary. The triangulated links provide both forward/rearward and lateral bracing for the 9" housing, and offers both excellent acceleration and handling characteristics.

A more sophisticated setup is offered with AME's track day-proven 3-link package. The forward/rearward housing motion is controlled with three links, while it remains perfectly centered through use of a Watts linkage. Strange Engineering adjustable coil-over shocks are employed for both the Tri 4-bar and 3-Link subframes, as are special adjustable sway bars.

The third choice comes in the form of AME's new Multi-link I.R.S. Here, you have a choice between the rugged Strange S60 center section and half-shafts with CV joints for higher power levels or late model GM components.

Primary advantages include independently compensating for any bumps or road irregularities to always provide an optimum tire contact patch, a smoother ride and reduced NVH (noise, vibration and harshness).

2"x4" Welded rear subframe	\$2,640.00
9" Housing with all brackets.....	1,285.00
Watts linkage with poly rod ends.....	490.00
3-Link bars w/johnny joints	805.00
Strange C/O's w/springs, w/bearings ..	560.00
Lwr c/o mount kit	55.00
Sway Bar	320.00
TOTAL.....	6,155.00
