**SMALL BLOCK HEADER KIT**

**COATED ULTIMATE HEADERS**

**LS HEADER KIT**

## Header Kits for Morrison GT Sport Chassis

Configuring an exhaust system is one of the most important parts of any build. We've developed, in collaboration with Ultimate Headers, a complete line of headers to cover all of our GT Sport chassis applications with a variety of

engine options for each. These headers feature thick 3/8" flanges to assure trouble-free dependability and ball-type collectors are employed to facilitate leak-free hook-ups to the exhaust system. Given that chassis applications

will vary, please contact our staff for details. Headers are also available with a ceramic-metallic coating. As AME is a dealer for Ultimate, we can provide headers for other applications. Please call for specific pricing and availability.

### Body Mount Kit

Mounting a body on a Morrison GT-Sport chassis is facilitated with this handy kit, which has the necessary body bushings and stamped components to ensure a secure attachment. AME has body mounts for other select applications.

### Steering Linkage

This convenient kit, which features Borgeson universal joints, contains those components you'll need to connect the power steering rack to the column. Kits are available in polished stainless or bare finish.

### Housing Breather Kit

Eliminate those pesky leaks that 9" Ford housings are known for. This "catch can" mounts above the housing. Excess pressurized gear oil goes to the tank, is vented, and drains back after parking the car.

40403020 Housing Breather Vent for Hose . . . . \$15.00  
40403030 Housing Vent Tank . . . . . 45.00

### LS Engine Mounts

We've developed a highly effective mounting package for LS engines that incorporates Energy Suspension polyurethane bushings, and adapter plate with a positive stop, and OEM-style Chevy mounts. It's easy to use and very secure. Available for other engine combinations.

### Brake Line Kits

Here's everything you'll need to "plumb" the brake lines on your GT Sport chassis. Stainless steel is used exclusively for the lines and fittings to assure you of total long-term reliability. Use in conjunction with our Master Cylinder kit. Ask about kits for other applications.

### M/C Adapter & Line Kit

Our adapter (not shown) lets you mount a tandem-style dual reservoir master cylinder to the firewall, and allows use of the stock Chevy pedal assembly (and the OEM ratio). The line kit lets you easily plumb the tandem M/C into the brake system.
